DERLY VALERIA HUELGOS ROJAS

SOFTWARE ANALYST AND DEVELOPER

As a technologist in software analysis and development, I have had the opportunity to acquire knowledge and skills in the field of technology. Although I do not yet have extensive formal work experience, I have participated in academic projects where I have applied my knowledge and developed software solutions, such as: Curriculum Vitae Portfolio (Website) and a training project for a mobile application to enhance the field pharmacist.

On the other hand, during my academic training I have acquired knowledge in programming languages, such as JavaScript, HTML and CSS. I have also learned about the design and development of web and mobile applications, as well as the management of relational and non-relational databases, as well as graphic design.
